

*Lead is a toxic metal that is harmful to human health. Since children are particularly vulnerable to lead, identifying potential sources and reducing exposure to lead is critical to protecting children.*

## Upcoming Webinars

**2:00pm – 3:00pm ET**

**June 21, 2017**

*Denver, Colorado*

**September 20, 2017**

*TBD*

**December 13, 2017**

*TBD*

# Reducing Lead in Drinking Water in Schools and Child Care Facilities

## Case Studies Webinar Series

EPA is hosting a quarterly webinar series to highlight examples of efforts to reduce lead in drinking water in schools and child care facilities.

These webinars will include a brief overview of lead in drinking water, information regarding where to find resources and perspectives from a state, water system and/or school. Presentations will include: best practices, lessons learned, challenges, funding, procedures, and available resources.

### How do I register?

Find registration links to upcoming webinars in this series here:

<https://www.epa.gov/dwreginfo/drinking-water-training>

### Who should attend?

Schools, states, primacy agencies, water systems, technical assistance providers and those seeking information about implementing a lead testing program for school drinking water.

### Where do I find more information?

For questions, comments, or feedback regarding the webinars, please contact: [banks.victoria@epa.gov](mailto:banks.victoria@epa.gov)

To view resources and for more information, please see EPA's Drinking Water in Schools and Child Care Facilities page:

<https://www.epa.gov/dwreginfo/drinking-water-schools-and-childcare-facilities>

### 3Ts for Reducing Lead in Drinking Water in Schools

EPA developed the 3Ts for Reducing Lead in Drinking Water in Schools using a training, testing, telling approach, to assist schools in implementing a voluntary lead testing program.

Find the 3Ts full toolkit and other resources here:

<https://www.epa.gov/dwreginfo/drinking-water-schools-and-childcare-facilities>
